Need to preface offer with this:

Given the short laycan you relayed to me for this vessel (ETA 08:00 October 3, ETD 18:00 same date) and the relatively large quantity she's looking for – it must be stated that the job length is estimated to exceed her port stay. Considering the heavy traffic in the harbor that early in the morning and the fact that this is looking more like a 12 hour job (tie-up, paperwork, discharge), there is a good chance it would go beyond ETD.

If this is the case, we cannot be held liable for any delays. This job – quite simply – is longer than the proposed vessel laycan. We will also expect the vessel to take the full volume and not request a ship-side stop

Pleased to offer:

553 mtd for RMK

Gasoil is on another barge that will be busy during this time, so no-quote

+ anchor (\$450)/taxes (9%), October 13 (Columbus Day) Holiday charge on barge movements - \$250/hour min. 8 hours - as applicable

Projected RMK:

8.9 API

340 Visc

3.3% Sulf

157 Flash

15 MCR

20 Al + Si

0.02 Ash

260 Van

0.2 Water

Competition : Chemoil/Chevron/Peninsular/Gefu/Japanese

Let me know

Thanks

Kai
